Advices from Paducah, received last evening, represent the town queet. There are now about 7,000 of our troops there. Citizens of Paducah state that the inhabitants are sending off their families as rapidly as possible, in expectation of an attack. They report tien. Fillow within 30 miles of the town, with 20,000 men. The indications are strong that there will be bloody work in Southern Kentucky.

A sun on one of the gunboats et Paducah was accidentally discharged on Friday, seeding a shell through a house, which fortunately happened to be uninhabited.

No intrenchments had been thrown up at Paducah yesterday, but there will soon be considerable work done in that line.

The bridge over Clark river, on the railroad from Paducah to Mayfield, has been destroyed by our troops, who now have possession of the road.

THE SOUTHERN COMMESSARENT.-The Richmond correspondent of the Memphis Appeal writes

A letter opposite to the system as follows:

A letter opposite the ellier to be from the pen of a distinguished citizen of the centry of Albemarla, which information leads the public to interpret the initials F. M., given as a eigneture, as those of Franklin Minor, E.y. This guthruan has for years stood high in the councils of the Democratic party of Virginia, and has readered entire services, both to the cause of education and agriculture, and if the letter be indeed written by him, it is entitled to us caulal share of consideration in advance. It makes a lend an Mitter complaint against the President and the Secretary of War on account of the savera privations of the tion in advance. It makes a loud anabilitier complaint against the President and the Secretary of
War on account of the severa privations of the
irrops in the field, who are represented as elmost
in a state of starvation. There can be
no doubt whelever that in every division
of the army the Commissary Repartment is in
a wretched condition, and that two with enabundance of the necessaries of life readily obtainable by the authorities. How far the President is to blane in the matter ta not to be determined hastily and without examination. In the
mountainous parts of the State the roads have
been remiered well nigh impassable by the recont
rains, and the difficulties of transportation must
be taken into the account in measuring the responsibility. As for the commissarist at Norfolk, al Yorkiman, and at Manassas, no such excuse can be assigned, and it is out of the question
that the troops at these places chould unler for
the want of plentiful, wholesome field. But I'm I'm
is not the first person who has intunited the utter
unitness of Mr. Welker for the important position of Secretary of War. Certainly, the interesses of the Confederate States are too mementous,
and the existency is too alleun, for men to be retained in other who are not fully equal to the labers and responsibilities it places upon them.

ien. S. B. Buckner and Col. Thos. Hunt, te of the State Guard, and Maj. Casseday still a member of that organization, were there awaiting the arrival of companies of the Guard from this city. Those three men should blush for the positions they occupy. They are terping their souls in gnilt.

Gen. Buckner, the Commander of the state Guard, played the hypocrite before the world for months. In all his conversations with Union men, he held himself out as inion man when in truth he was a secessionst. He declared himself a Union man to the riends of the Union, whilst he was secretly and actively at work poisoning the lovalty the young men over whom his office gave him State Guard were, when they went into that organization, in lavor of the Union, but four tifths of them, seduced by him and his accomplices from their lovalty, soon became the v taries of disunion. He and his co-worker taught them to spurn their allegiance to their the Constitution of the United States. Beyond all doubt he has done more than any other living man to corrupt and debaneh the minds of the youth of our State. He has done what ten thousand like him could never atone for. If he is conscious of the atrocity of his course, his bed must be surrounded nightly by the Furies. Hundreds of fathers and mothers have cause to curse him in the hitterness o

their souls. This General Buckner is not merely a hyp crite but a spy. Just before the close of the last session of Congress he went to Washington and there pretended to be a Union man for no other purpose than to enable himself to obtain the military secrets of the Government. A prominent Union member of Congress from this State wrote to us that he had just had a long conversation with Buckner, and that the latter assured him, or at least gave him the strongost reason to believe, that, upon his return home, he would take service in the army of the United States and fight against the Confederates. By holding ont this idea to the military authorities at Washington and professing excessive loyalty to the United States, for action we shall not cease to call with free- he obtained permission to go through all the fortifications and camps, examining them as minutely as he pleased. All the while he was husily gaining knowledge to be used against those who trusted him and whom he deceived. His treachery was of the basest and blackest His perfidy was almost without parallel. Here he professed himself a Union an the better to be enabled to taint the souls of loval youth, and there he professed to be a Union man the better to spy out military secrets for the use of his country's enemics. His name should be the synonym of eternal in-

Of Col. Hunt and Major Casseday we have little now to say. They are fulfilling their mission of treason. They are at home in the camp of an enemy that has invaded their State or rather a State which was theirs. Both of them worked diligently with Buckner in corrupting the State Guard. Both of them came her decide for herself whether she will or to us personally, and one of them repeatedly, when they wanted legislation in behalf of the State Guard, assuring us that the nath taken Constitution of the United States was an ample willing to "allow" her, he will occee her, guarantee of their loyalty to the Union and their opposition to secession, but both of them, with that eath upon their own consciences were no doubt even then at work in favor of disunion, and certainly both of them, very soon afterwards, encouraged the spirit of secession among the Guard, telling them that a thousand oaths to support the Constitution of expulsion of the invader. Polk, if he had been as anxious to observe our mentrality as he was it involve us in war, that it was done to keep him out and protect Kentucky from invasion. The Reverend General thinks the Government disregarded Kentucky neutrality hy planting a battery on the shore opposite Columbus, with the Mississippi river letween them, but of course he would think that Tennessee had protected our neutrality hy keeping 30,000 or 40,000 men in a stone's throw of our line for months before. The only dillerence between him and Kentucky is that she would prefer to judge her own honor and interests, and will call on him for protection whon she wants it at his hands.

It is difficult to say which excels, the insolence of the whith - sowned commander or the transparence of the whith - sowned commander or the transparence.

If, within the limits of your freedly relations, your language and your counsels may contribute to this realt, you will respond, sir, to the intension of his Majesty, the Emperor, in devoting to this the personal influence which you may have been able to acquire during your long residence at Washington, and the consideration which belong to your character, as the representative of a soversign submatch by the most friendly sentiments towards the American Union. This Union not slimply, in our eyes, an element essential to the universal poll ical equilibrium, it constitutes besides a nation to which our asquet master and all Russia have pledged the most friendly interest, for the two countries, placed at the extremities of the two worlds, both in the ascending period of their development, appear called to a natural community of interests and of apuspathies, of which they have already given multual proofs to each other. I do not wish here to approach any of the questions which divide the United States. Wa are not called upon to express ourselves in this contest. The praceding emisderations have no other of set than to attest the lively solicitude of the Emperor in the presence of the dangers which means the American Union, and the success winter which has Majesty entertains for the maintenance of that great work so laboriously raised, and which appeared so tech in its future.
